3 SECURITY

3.1 Estate Security

- 3.1.1 The security of the Estate is of paramount importance;
- 3.1.2 Owners and their Tenants shall at all times comply with whatever security systems and procedures relating to access control or other security aspects which may be implemented by the CLHOA;
- 3.1.3 It is to be noted that the perimeter security and access control system serves as a deterrent and detection function and is not guaranteed to prevent a determined attempt at the intrusion into the Estate;
- 3.1.4 Accordingly, neither the CLHOA nor its Security Contractor nor any of their Agents, or Employees shall be liable for any loss of life, injury, damage or loss of property suffered by any person;
- 3.1.5 Whichever contracted security Company undertaking the access control and Estate security is the contracted Agent of the CLHOA, not of individual Owners or their Tenants. No Owner or Tenant may issue an instruction to Security Employees other than directly through the Estate Management;
- 3.1.6 There will be NO tolerance of abuse (verbal or physical) of security employees, or of a lack of co-operation or non-compliance with any issued instructions. Penalties and/or legal and criminal steps will be taken against offenders at the discretion of the CLHOA. The Security Company may also institute independent action separately.
- 3.1.7 Should an Owner wish to install an alarm system on their property they may do so subject to the following:
 - ✦ The alarm must be silent;
 - ✦ Approval must be obtained from the CLHOA prior to installation;
 - ✦ A standard size display sign may be erected on the property;
 - ✦ The chosen Security Operator must abide by all the Rules of CLHOA that may be applicable to such Operator and in particular but not limited to any instruction or request of Estate Security as well as all Estate Road Traffic Rules.
- 3.1.8 While the CLHOA has the responsibility of securing the Estate perimeter as well as access to and egress from the Estate it is the responsibility of each property owner / Tenant to secure their individual properties

3.2 Access control (to be ratified at the 2026 AGM)

- 3.2.1 Security and access control to the Estate, is a primary business object of the CLHOA. The CLHOA will through its security portfolio from time-to-time issue and implement policies and procedures ("Protocols") related to security, including access and egress controls, and related systems or platforms supporting such Protocols. All Protocols, whether written or verbal, issued by Estate Security, the CLHOA or its appointed agents or security contractors, shall be observed and fully complied with by Owners, Tenants, other Residents, and their invited visitors.
- 3.2.2 All Residents are obliged to register on the applicable access control system deployed by the CLHOA from time to time. Biometric access is first and foremost reserved for Residents of the Estate and not visitors. Owners, and where applicable, Tenants, shall primarily be responsible for approving biometric access to the Estate, which shall be reviewed and finally approved and then managed through the CLHOA. Without Owner approval, no person may be granted biometric access to the Estate. Where an Owner sells their property, all access related to the stand being sold shall be managed and transferred in accordance with the terms of sale. Where a Tenant is granted access to the Estate by an Owner through a lease, the Owner becomes responsible for the conduct of the Tenant including any biometric access, controls and compliance. When an existing lease is extended or expires, as the case may be, the Owner must inform the CLHOA of such extension or expiration to ensue access is extended or cancelled.
- 3.2.3 There is a significant cost attached to operating and maintaining a secure access control system. Where Owners or Residents fail to pay their levies or other dues on time, it places a financial burden on the CLHOA and its Members. It follows and Members acknowledge and agree that granting access through a secure control system via biometric measures, is a paid for privilege and shall only be afforded to those Owners and Residents who are up-to-date with their levies or other amounts owing to the CLHOA. The CLHOA therefore reserves the right, which is deemed proportional and reasonable, to suspend the operation of an Owner or related Tenant's or Resident's biometric or similar access should that Owner or Resident be indebted to CLHOA. This suspension right extends to individuals residing or working at the applicable stand. Accordingly, should an Owner or Tenant be in arrears in respect of any levy, or other amounts, the CLHOA may suspend biometric access privileges. Owners and Tenants will be provided with written notice prior to such access privileges being suspended. The CLHOA may not use the suspension right as a levy or debt collection tool.
- 3.2.4 Access through biometric means may also be suspended at the reasonable discretion of the Estate Security or CLHOA should an Owner, Tenant, other Resident or their invited guests have contravened the Estate Rules, or whose conduct jeopardises the integrity of the access control system or places the Estate's or Residents security at risk.
- 3.2.5 While the CLHOA is entitled to suspend biometric access for the reasons described above, it shall not be entitled to deny access to the Estate to any *bona fide* Owner or Tenant whose biometric access privileges has been suspended. In such a case, the Owner or Tenant will continue to have full access to the Estate but will be required to follow manual Protocols in accordance with guest entry and exit processes.
- 3.2.6 The CLHOA and its appointed Security contractor shall be entitled to deny access to visitors, agents or contractors at their discretion, provided such discretion shall be exercised reasonably and in the interest of the Estate's security.

- 3.2.7 As a principle, and subject to 3.2.8, only Residents shall be entitled to register and use the biometric access system deployed by the CLHOA. A Resident may as an exception and on special written application request that a non-resident be granted biometric access. The CLHOA may in its sole discretion grant such biometric access on conditions it deems fit (for example – for a caregiver regularly attending to a Resident unable to grant access by reason of being infirm). Any person undertaking building activities within the Estate is required to ensure registration of labourers with the CLHOA where they will be on site for five or more days, but such registration precludes biometric access;
- 3.2.8 Employees of Residents, including but not limited to, domestic workers, gardeners, and drivers may at the discretion of the Owner or Tenant be entitled to receive biometric access in accordance with 3.2.2;

The security of the Estate is dependent upon being able to identify persons and vehicles entering the Estate and the use of Owner or Resident's biometrics to allow access for or on behalf of any 3rd party is strictly prohibited. Following from the aforementioned, system codes generated by a Resident shall only shared once, to the designated visitor and the further transmission or sharing of system generated codes is strictly prohibited. Sharing of codes other than to the designated visitor and circumventing other Security Protocols compromises the security of the Estate and is subject to a penalty;
- 3.2.10 For the purposes of maintaining the integrity of the Estate's security, the CLHOA may verify the identity of any passenger in a vehicle entering the Estate. Residents may be required to issue codes to individual guests who are passengers in a vehicle entering the Estate, in addition to the driver (the aforementioned is of particular relevance where taxi or ride sharing services are used by Residents or their invited guests). Residents shall fully comply with applicable security Protocols in this regard. Where passengers in a vehicle entering the Estate, fail or refuse to provide reasonable identification or otherwise fail to cooperate with Estate Security, such passengers may be denied access to the Estate in accordance with 3.2.6 above;
- 3.2.11 CLHOA reserves the right to search any vehicle or person entering or exiting the Estate and may delegate such function to the Estate's Security provider, who may exercise such right within their discretion. Any refusal to consent to such search may result in either the vehicle or person being denied access to the Estate as the case may be, however it is specifically noted that no bona fide Owner or Resident may be denied access to the Estate.

Failure to adhere to the aforementioned may render the applicable Member liable for a fine as determined by the Board from time to time, not exceeding R5000, and may also lead to the visitor(s) or 3rd party(ies) being blacklisted and refused entry into Cedar Lakes, either temporarily or permanently at the Board's sole discretion;

- 16.3.5 It is accepted that with installations on existing walls it is not always practical to build in the services, but care must be exercised to install the service neatly with a minimum blemish to the exterior view of the building. All these services are to be housed in rectangular or square PVC trunking of the smallest practical size. It is not always the shortest route that looks best, and the trunking must be erected in vertical and horizontal directions. The trunking is to be painted with the same paint colour used on the exterior walls to which it is attached. A suitable primer or undercoat to be applied where necessary.

🔧 **Water Pipes**

Up to 25mm diameter can be attached to the exterior where recessing is not practical and must be painted with the same paint used on the exterior walls to which it is attached. A suitable primer or undercoat to be applied where necessary. Sizes above 25mm to be discussed with CLHOA.

🔧 **Rainwater pipes**

Can be attached to the exterior walls. See rules for Gutters and Downpipes

17 GENERATORS

Any installation of a generator, whether purchased or rented and irrespective of output or portability, requires approval from the Architecture committee. All applications will be reviewed against the following criteria:

17.1 Location

- 17.1.1 May not be installed on common property (pavements, greenbelts and roads);
- 17.1.2 May not be visible from the road or greenbelts. Planting or other screening may be required;
- 17.1.3 Fire safety: must not be within 1m of boundary;

- 17.1.4 All fuel to be stored in leak proof/airtight containers specifically designed for such storage e.g. Jerry cans;
- 17.1.5 Potential for noise disturbance – whilst it is accepted that generators are noisy, attempts should be made to position them for minimum impact on neighbours.
- 17.1.6 Sufficient ventilation to prevent fumes build-up is required. If the unit is not to be used externally then full details will be required of venting in accordance with National Building Regulations.

17.2 Operating times

- 17.2.1 Generators may not be operated between 22h00 and 06h00;
- 17.2.2 Generators may only be used during power outages of the utility provider's electricity supply, e.g. City Power.
- 17.2.3 Specific generator runtime periods are restricted to periods during load shedding, the utility provider's infrastructure failures, utility provider's imposed load rotations and failure of the electrical supply to the resident's home.
- 17.2.4 At all times the operating times detailed in paragraph 35.2.2 will supersede the preceding circumstances.
- 17.2.5 The purpose of this rule is to explicitly disallow the running of generators to augment solar or any other alternative power solutions, or if the resident has been disconnected from the utility provider's network, for any reason.
- 17.2.6 This rule may only be deviated from under exceptional circumstances i.e. medical reasons. CLHOA must approve this if possible.
- 17.2.7 If it can be demonstrated that the generator unit in operation cannot be heard from adjacent properties, then exemption from this rule may be granted;
- 17.2.8 Requirements for approval - portable generators:
- 17.2.9 This applies to small portable generators that are not connected into the existing electrical circuits / distribution board but merely have an extension cord that electrical appliances may be plugged into.
- 17.2.10 A site plan showing the location of the intended operating position including proximity to boundary walls needs to be submitted for approval prior to use to assess fire safety.
- 17.2.11 Surrounding neighbours' signed approval on said site plan is needed. Where in the opinion of the estate manager, neighbour approval is being unreasonably withheld; the estate manager may approve the application on the basis of an inspection and sufficient motivation.
- 17.2.12 Where possible, full details of the generator to be purchased, needs to be included in the application for approval.

Note: The risk of Carbon Monoxide (CO) poisoning is very real. Portable generators are not intended to be used in closed spaces. CO build-up is possible in open sided carports and hence these areas are not considered to be external.

17.3 Requirements for Approval – Permanently connected Generators

- 17.3.1 Any generator that is intended to be permanently connected into the existing electrical circuits / distribution board must be installed by a qualified electrician and the appropriate compliance certificate issued, a copy of the certificate must be lodged with the HOA who will attach this to the approved site plan, a copy of which is retained at the office for future reference;
- 17.3.2 Applications for approval of permanently connected generators will be referred to the Sub-committee specifically set up to deal with such applications. This committee has been housed under the Architectural portfolio, and applications will be reviewed against the National Building Regulations;
- 17.3.3 A site plan showing the location of the intended position including proximity to boundary walls needs to be submitted for approval prior to installation;
- 17.3.4 Surrounding neighbours' signed approval on said site plan is needed. Where, in the opinion of the Estate Manager, neighbour approval is being unreasonably withheld; the Estate Manager may approve the application on the basis of an inspection and sufficient motivation;
- 17.3.5 Where possible, full details of the generator to be purchased needs to be detailed in the application for approval;
- 17.3.6 A response to an application will be given within 24 hours in respect of portable generators and 48 hours in respect of permanent generators, workloads permitting. Submissions must be lodged at the Estate office before 14H00 on any given day, Monday to Friday.

18. BOREHOLE DRILLING AND WATER ABSTRACTION

The Cedar Lakes Homeowners Association (CLHOA), under its Memorandum of Incorporation (MOI), has as its main object the promotion and protection of communal interest, including the communal water resources within the estate.

18.1 Hydrological Context

The estate's water management system relies on three primary sources being: rainwater runoff – a critical source for replenishing surface water bodies, a tributary of the Klein Jukskei River – which contributes to surface and groundwater recharge and finally an underlying aquifer falling under the A21 catchment area, classified as a finite and potentially stressed resource that requires careful monitoring and conservation.

Given the interdependence of these water sources, excessive groundwater abstraction could lead to lowered water tables, reduced baseflow to lakes and wetlands, and long-term depletion of the aquifer. It accordingly falls to the CLHOA, in accordance with its MOI to manage the water systems and specifically the aquifer in order to protect the communal interest of members.

18.2 Borehole Application and Approval Process

To ensure sustainable water management, any member seeking to drill a borehole must adhere to the following approval process and make application to the CLHOA before drilling:

- 18.2.1 Regulatory Compliance. Prior to commencing any drilling or abstraction, members must:

- ✎ Obtain all necessary approvals from regulatory bodies such as the Department of Water and Sanitation (DWS) and the City of Johannesburg, in compliance with *inter alia* the National Water Act (Act 36 of 1998) and share these approvals with the CLHOA.
- ✎ Demonstrate adherence to any water use licensing requirements, particularly if abstraction exceeds permissible limits for domestic use.

18.2.2 CLHOA Approval Requirements. In addition to any formal regulatory compliance, prior to drilling any borehole, a member must also submit a written request to the CLHOA for approval to drill such a borehole. Such request must include at least the following:

- ✎ Purpose of Abstraction – detailing whether the borehole will be used for domestic, irrigation, or other purposes.
- ✎ Site Plan & Borehole Design – including precise location coordinates, drilling depth, casing details, and expected yield.
- ✎ Expected Extraction Volume – with calculations demonstrating sustainable withdrawal rates.
- ✎ Monitoring & Measurement Plan – specifying flow metering, water quality testing, and CLHOA’s access to monitor usage.
- ✎ Neighbouring Property Consent – written approval from adjoining and adjacent property owners to ensure communal water resource protection.
- ✎ Potential Impact on Estate Water Resources – assessment of how the proposed borehole may affect the CLHOA’s DWS licenses, surface water bodies, and overall estate water balance.

18.3 Decision-Making and Oversight

The CLHOA will reasonably evaluate a request for the drilling of a borehole application made by a member with consideration for *inter alia*:

- ✎ The sustainability of the aquifer and estate’s waterbodies,
- ✎ Potential ecological and hydrological impacts,
- ✎ Estate-wide water security and compliance with conservation policies,
- ✎ Compliance with applicable legislation and water licenses, and
- ✎ Whether such borehole serves the communal interests of the Estate.

Any decision by the CLHOA will be made within a reasonable timeframe, and where applications are declined, written reasons will be provided. The decision will align with CLHOA’s main business objectives, ensuring responsible groundwater management while balancing individual water use rights with communal sustainability. A decision may be made with conditions, and in which case members drilling a borehole shall be bound to comply with such conditions.

18.4 Pre-Existing Boreholes

18.4.1 Existing borehole owners must, within three (3) months of this rule’s commencement:

- ✎ Install CLHOA-approved water metering devices;
- ✎ Allow monthly access to CLHOA to monitor abstraction volumes.

18.4.2 CLHOA will set reasonable abstraction limits for existing boreholes within six (6) months, which must be strictly observed.

18.5 Compliance and Penalties

Should any member drill a borehole without having followed the process described herein, they shall be liable for a fine of up to R10,000 per month for so long as the borehole remains in place.

Should a member who has been granted permission to drill a borehole fail to observe the conditions that accompany any approval by the CLHOA, such member shall be liable for a fine of R10,000 per month for so long as the member fails to meet the conditions.

19 GENERAL

- 19.1 Fauna of any nature may not be chased, trapped or harmed in any manner by Occupants or their visitors, guests, invitees, Tenants, contractors, employees etc.;
- 19.2 The CLHOA or their designated Agents may impose penalties on Owners and Tenants for non-compliance with the rules as per paragraph 9.2.3 of the Memorandum of Incorporation. A schedule of penalties is set out in detail in paragraph 21;

- 20.5 No Owner may enter into a lease of a property on the Estate unless such lease contains a copy of these Rules and an acknowledgement of receipt thereof by the Tenant. Owners are responsible for ensuring that their Tenants abide by the Estate rules;
- 20.6 In the case of a sale of a property, the seller must personally ensure that the buyer is informed about and receives a copy of the Rules, Contractors Code of Conduct and any other administrative regulations applicable at the time of purchase. Failing this, the buyer will only have recourse against the seller;
- 20.7 Where an Owner does not wish to utilise the services of an approved Estate Agent, he may select an Agent of his choosing. However such Agent must arrange to meet with the Estate Manager and present a copy of his/ her Fidelity Fund Certificate and undergo an induction process covering the rules of the Estate, after which he/she will be presented with a letter of authorisation, a copy of which may be called for at any time. The purpose of this is to protect prospective buyers and the Estate against unscrupulous and unethical Agents;
- 20.8 No Agent may deal in any property in the Estate unless they have been approved by CLHOA either via the formal approval process or the process set out above;
- 20.9 Every Owner shall within 72 hours of entering into and or exiting from a lease agreement over a property on the Estate, notify the Estate Manager in writing giving details of:
